Notwithstanding BT2.2, Purchaser is required to pay for, cut, and remove the Non-Sawtimber Products of Included Timber listed in AT2 and those Non-Sawtimber Products listed in the following table, unless otherwise agreed.

If Purchaser can sufficiently demonstrate that no market exists within the normal delivery distance for specific Non-Sawtimber Products, Forest Service and Purchaser may agree to alternate removal requirements of such Non-Sawtimber Products as specified in the alternate removal agreement. See Agreement Example.

The agreement for alternate removal requirements shall be executed prior to removing any timber from the Unit(s) included in the agreement. Alternate removal requirements shall apply only to whole units and not to portions of units. All material meeting alternate removal specifications shall be cut and moved to locations designated in the agreement.

Volumes of material with alternate removal requirements will be determined from the cruise report for the sale.

Purchaser will be charged for the following:

CT2.351# - DESIGNATION BY SPACING (04/2004)

Within Payment Unit(s) 1, as shown on Sale Area Map, all live pine trees, except trees Marked with orange paint or described to be left uncut, that meet Utilization Standards and one or more of the following criteria are designated for cutting.

(a) The required spacing is a maximum average of 30 feet. The tree is within 15 feet of a live pine tree that has a larger stump diameter than it; and the larger tree is not designated for cutting.

(b) The tree is within n/a feet of a n/a tree greater than or equal to n/a inches stump diameter; and this tree is not designated for cutting.

(c) The tree is Marked with blue paint.

Distances are measured horizontal distance, outside bark stump height to outside bark stump height. Stump diameter is measured outside bark at stump height in a horizontal plane and is the average of a measurement across the short axis through the true center of the stump and a second measurement at right angles to the short axis.

All n/a shall be left as leave trees, unless Marked with n/a paint. No tree greater than or equal to n/a inches stump diameter shall be cut, unless Marked with n/a paint. Cutting unit boundaries and other trees that shall be left uncut are Marked with n/a paint.

Distances are measured horizontal distance, outside bark stump height to outside bark stump height. Stump diameter is measured outside bark at stump height in a horizontal and is the average of a measurement across the short axis through the true center of the stump and a second measurement at right angles to the short axis.

Purchaser and Forest Service shall agree to skid trail location under BT6.422. Skid trails shall be no greater than n/a feet wide with a n/a foot spacing. Quantities of trees located in skid trails are Included Timber under AT2.
